TOP DRESSING

R i n k D S

550SP

The new top dresser is the first ever walk-in-front disc spreader on the market. It contains a 12 hp engine and spreads top dressing material up to 40 feet (12 meters) wide.

Now you can top-dress with a pedestrian unit much like is done with walking aerifiers. The DS550 is hydrostatic driven, with great traction and a very light footprint.

SPECIFICATIONS	DESCRIPTION
