# 1205

The 12 series top dressers offer you the widest brush applicator top dresser available with a smooth even spread, over 6 feet (1.80 meters) wide. This makes the 1205 body mount spreader ideal for fitting onto your utility vehicle, as its spreading width will be outside the vehicle's wheel width. The 1205 is hydraulically powered, either from the prime mover or optional auxiliary tank and pump unit. The full width continuous loop belt has edge guides to ensure central tracking.

FEATURE	BENEFIT
Precise Metering	Enables fine control over density
Easy Belt Adjustment	Two tracking guides keep belt centered
Exact Spreading Widths	For neat and economical operation
Ideal Weight Distribution	Prevents compaction and damage to turf

## TOP DRESSING

# Rink 1205

SPECIFICATIONS	DESCRIPTION
Length	63" (1.60 m)
Road Width	80" (2.00 m)
Working Width	72" (1.80 m)
Height	39" (1.00 m)

Capacity	1.0 cu. yd. (0.8 cu. m.)
Hydraulics Required	3.6 gpm/980 psi
Options	Auxiliary tank and pump unit

### Ensuring a smooth, even distribution

Delivery and metering system

Hopper

The Rink delivery and metering system is designed to ensure smooth, even distribution of all types of top dressing materials, including wet sand. The hopper is made of aluminum to avoid rusting.
